Reading order: Pages 3-12 explain the core gameplay. Use pages 13-15 for Keywords, Status, Healing, and Quick Reference.

1. Understanding Grandis Legacy and the Battlefield

Grandis Legacy is an RPG-Style TCG focused on Hero progression, tactical positioning, Class-based play, and Legacy after defeat.

A standard match is played by two players, with each player using 3 Heroes.

Primary win condition

Defeat all 3 opposing Heroes.

Match Draw: Both players lose their last active Hero in the same Attack/Defense exchange.

Deck-out

If the Main Deck is empty and the mandatory Draw Phase draw cannot be performed, that player loses.

A Draw effect takes as many cards as are available, including 0, without causing an immediate loss. Deck-out occurs only when the mandatory Draw Phase draw cannot be performed.

Game Areas & Components

Area / Component	Function
Hero Positions	Left, Center, and Right.
Main Deck	Holds Skill, Item, and Event Cards.
Legacy Deck	Holds Hero Rank I-III and Legacy Cards.
Mana Deck	Supplies Mana Shards to the Mana Pool.
Mana Pool	Holds available Mana Shards.
Discard Pile	Holds resolved or discarded cards.
Hand	Holds a player's private cards.
Attachment Slots	Each Hero has 2 slots for active Attachments.
Racial Tokens	Used to activate Racial Traits.

2. Main Deck Cards, Card Types, and Subtypes

The Main Deck contains exactly 50 cards consisting of Skill, Item, and Event Cards. A resolved card normally goes to Discard unless it becomes an Attachment or another effect moves it elsewhere.

Rule terms used for Main Deck cards: Card Type -> Card Subtype -> Keyword -> Card Text

Card Types

Card Type	Function
Skill	Class- and Rank-based actions used through Hero progression.
Item	Tools, consumables, protection, utility, or persistent buffs.
Event	Events that affect the game state.

Attack Types

Physical Attack
Deals Physical damage through an Attack.

Magical Attack
Deals Magical damage through an Attack.

Area Attack
Does not choose targets. Automatically affects all opposing active Heroes within the user's Area of Attack.

Casting Attack
Locks a target position and resolves later through Casting.

Other Skill Card Subtypes

Defense
Used during Response to protect a Hero or stop/modify an Attack.

Tactical
Preparation, position swaps, draw, buffs, or disruption.

Support
Healing, recovery, or other assistance.

Item Card Subtypes

Consumable
Single-use recovery or immediate utility.

Utility
Special-purpose tools and effects.

Protection
Protective Items, commonly used during Response through BLOCK or DODGE.

Buff
Persistent or temporary beneficial Item effects.

Event Card Subtypes

Regular
Normal Event Card.

Special
Maximum 1 copy of each Special Event Card per deck.

Lineage and Fallback Effect

A Hero may use Skills from earlier Classes in the same progression Lineage. Use the effect row that matches the Hero's Class and Rank. If there is no exact row, use the highest previous effect row available in that Lineage, as long as the Hero still meets the card requirements.

What Counts as a Draw?

Draw means taking a card from the top of the Main Deck into your Hand through a Draw rule or effect. The Opening Hand, cards added through search or selection, and cards returned from Discard to Hand do not count as Drawn.

Ultimate Card

An Ultimate Card that becomes an EXP Card or enters the Discard Pile cannot be returned to the Hand or Main Deck.

EXP Card

A card placed beneath a Hero as EXP. It is considered an EXP Card only while it is beneath that Hero.

3. Setup and Turn Structure

Game Setup

1. Choose 3 Hero progression packages for your Legacy Deck.
2. Place each Hero Rank I in the Left, Center, and Right positions.
3. Shuffle the Main Deck.
4. Build and shuffle the 12-card Mana Deck.
5. Draw 5 cards as your Opening Hand.
6. Draw 3 starting Mana Shards from the Mana Deck into your Mana Pool.
7. Start with Mana Regen 1 and 2 Racial Tokens.
8. Determine the first player and begin with the Draw Phase.

Deck Rules

Section	Rule
Main Deck	Exactly 50 cards: Skill, Item, and Event. Any mix is allowed.
Legacy Deck	Exactly 12 cards: three Hero progression packages.
Mana Deck	Exactly 12 Mana Shards: Regular and Color.
Copy limit	Normal cards: maximum 3 copies; Special Event: maximum 1 copy of each card; Ultimate: maximum 1 copy.
Hand limit	Maximum 8 cards at the end of the turn.

Turn Structure

Phase	Main Function
Draw	Ready Heroes; perform the mandatory Draw (or its replacement effect); then Mana Regen.
Deploy	Tactical, Item, Event, Ability, Racial Trait, Legacy Ability, Reposition.
Battle	Attack, Response, and any Casting that is ready.
Reform	Support, Tribute, Legacy Ability, Reposition.
End	Resolve Status/end-of-turn effects; reduce Hand to 8; pass the turn.

Timing: cards may only be used during their legal phase or timing. The first player cannot Attack during their first turn. During the first player's first Draw Phase, they do not perform the mandatory Draw. Mana Regen still occurs normally.

4. Mana Deck and Mana Pool

Mana Deck Composition

The Mana Deck contains exactly 12 Mana Shards. You may include any Color Mana Shards, with a maximum of 1 of each color. Fill the remaining slots with Regular Mana Shards.

Mana Value

Mana Shard	Payment Value
Regular Mana Shard	Counts as 1 Mana.
Color Mana Shard - matching Skill color	Counts as 2 Mana when its color matches the Skill Card.
Color Mana Shard - nonmatching Skill color	Counts as 1 Mana.
Color Mana Shard - Item / Event / other cost	Counts as 1 Mana.

Mana Regen starts at 1 and increases by +1 each Rank Up (maximum 6). During Draw Phase, after the mandatory Draw or its replacement, take Mana Shards from the top of the Mana Deck equal to Mana Regen, up to 12 in the Mana Pool. If the Mana Deck has fewer Mana Shards than your Mana Regen, take as many as are available.

Paying Mana

Pay the required Mana cost using Mana Shards from your Mana Pool, based on their payment values.

Mana Return Cycle

Spent Mana Shards return as one batch to the bottom of their owner's Mana Deck, not to Discard. For Skill payments, order: Regular Mana Shard, nonmatching Color Mana Shard, then matching Color Mana Shard (deepest/last). Later batches go below earlier ones.

Removing Mana

When removing Mana, remove as many Mana Shards as possible from the affected Mana Pool, up to the stated number. Return those Mana Shards to the bottom of their owner's Mana Deck. Count Mana Shards, not their payment value.

Opponent Mana Selection

When an effect tells you to discard, remove, or choose Mana Shards from an opponent's Mana Pool, choose the required number face-down without checking their identity. Then resolve the effect.

5. Exhaust and Card Use

Ready and Exhausted

State	Meaning
Ready	The Hero can perform legal active actions.
Exhausted	The Hero cannot perform normal active actions unless a rule or card explicitly allows it.

A Hero normally becomes Ready during its owner's Draw Phase. A Hero that is still Casting remains Exhausted.

Skill Cards

A Skill Card may be played only when its Class, Rank, Lineage, and other stated requirements are met. For a REVIVE Skill, the Hero being revived may meet those requirements if the card allows it.

When an active Hero uses a Skill, that Hero becomes Exhausted after paying the required costs, unless the Skill has BUFF or the card states otherwise.

Event Cards

A normal Event requires a legal Hero. After paying Mana and mandatory costs, that Hero becomes Exhausted. If the Event is later Negated, the Hero remains Exhausted.

Item Cards

Item Cards do not Exhaust a Hero by default. If an Item requires a Hero, follow the card text.

Defense and Reaction Use

Defense and cards used as a Reaction do not Exhaust a Hero. Normal card requirements still apply.

Racial Tokens

Maximum pool: 2. A player may use at most 1 Racial Token during their active turn. A legal Racial Trait can still be used while its Hero is Exhausted unless the card states otherwise.

Ready Requirement

A Hero must be Ready to use any card or effect that causes it to become Exhausted. An already Exhausted Hero cannot use such cards or effects unless explicitly allowed.

6. Heroes and Combat Basics

Each player has three Hero positions: Left, Center, and Right. An active Hero's position determines its normal Area of Attack (AoA).

Attacker Position	Normal Targets
Left	Left or Center.
Center	Left, Center, or Right.
Right	Center or Right.

Keywords such as MELEE and RANGE can modify the normal Area of Attack.

Using an Attack Skill

1. Choose an Attack Skill from Hand.
2. Choose an active Hero that meets the Skill requirements.
3. Choose a legal target if required.
4. Pay Mana and any mandatory costs.
5. Apply any required Exhaust.
6. The opponent receives a Response opportunity.
7. Resolve the Attack and its effects.

Targets and Area Attacks

- Non-Area Attacks choose a legal target unless the card selects one or requires no target.
- **Choose all targets before paying costs. If fewer legal targets exist, affect only those available unless the card states otherwise.**
- The defending player may respond separately for each affected Hero. Negating an Attack against one target does not cancel it against other targets.

- Area Attacks do not choose targets. They automatically affect all opposing active Heroes within the user's Area of Attack.

Swap and Reposition

Swap exchanges the positions of two Heroes, including through card effects. Reposition is a manual Swap between adjacent positions (Left-Center or Center-Right).

Manual Reposition	Result
Active Hero <-> Active Hero	Both active Heroes become Exhausted.
Active Hero <-> Legacy	Only the active Hero becomes Exhausted.
Legacy <-> Legacy	No Exhaust.

HP, EXP, Status, Attachments, and Exhaust stay with the Hero when Heroes swap positions. If the Hero is Casting, cancel it and move the Casting Card to Discard.

Manual Reposition: maximum 1 per active turn across Deploy and Reform. A Swap caused by a card/effect does not use this limit or automatically Exhaust unless stated.

Automatic Center - 1v1: When each player has exactly 1 active Hero remaining, both Heroes automatically move to Center without Exhaust, even if affected by Freeze or Stun. While the game remains 1v1, both Heroes must stay in Center and cannot be moved by Reposition or Swap. This restriction ends when a Hero is revived.

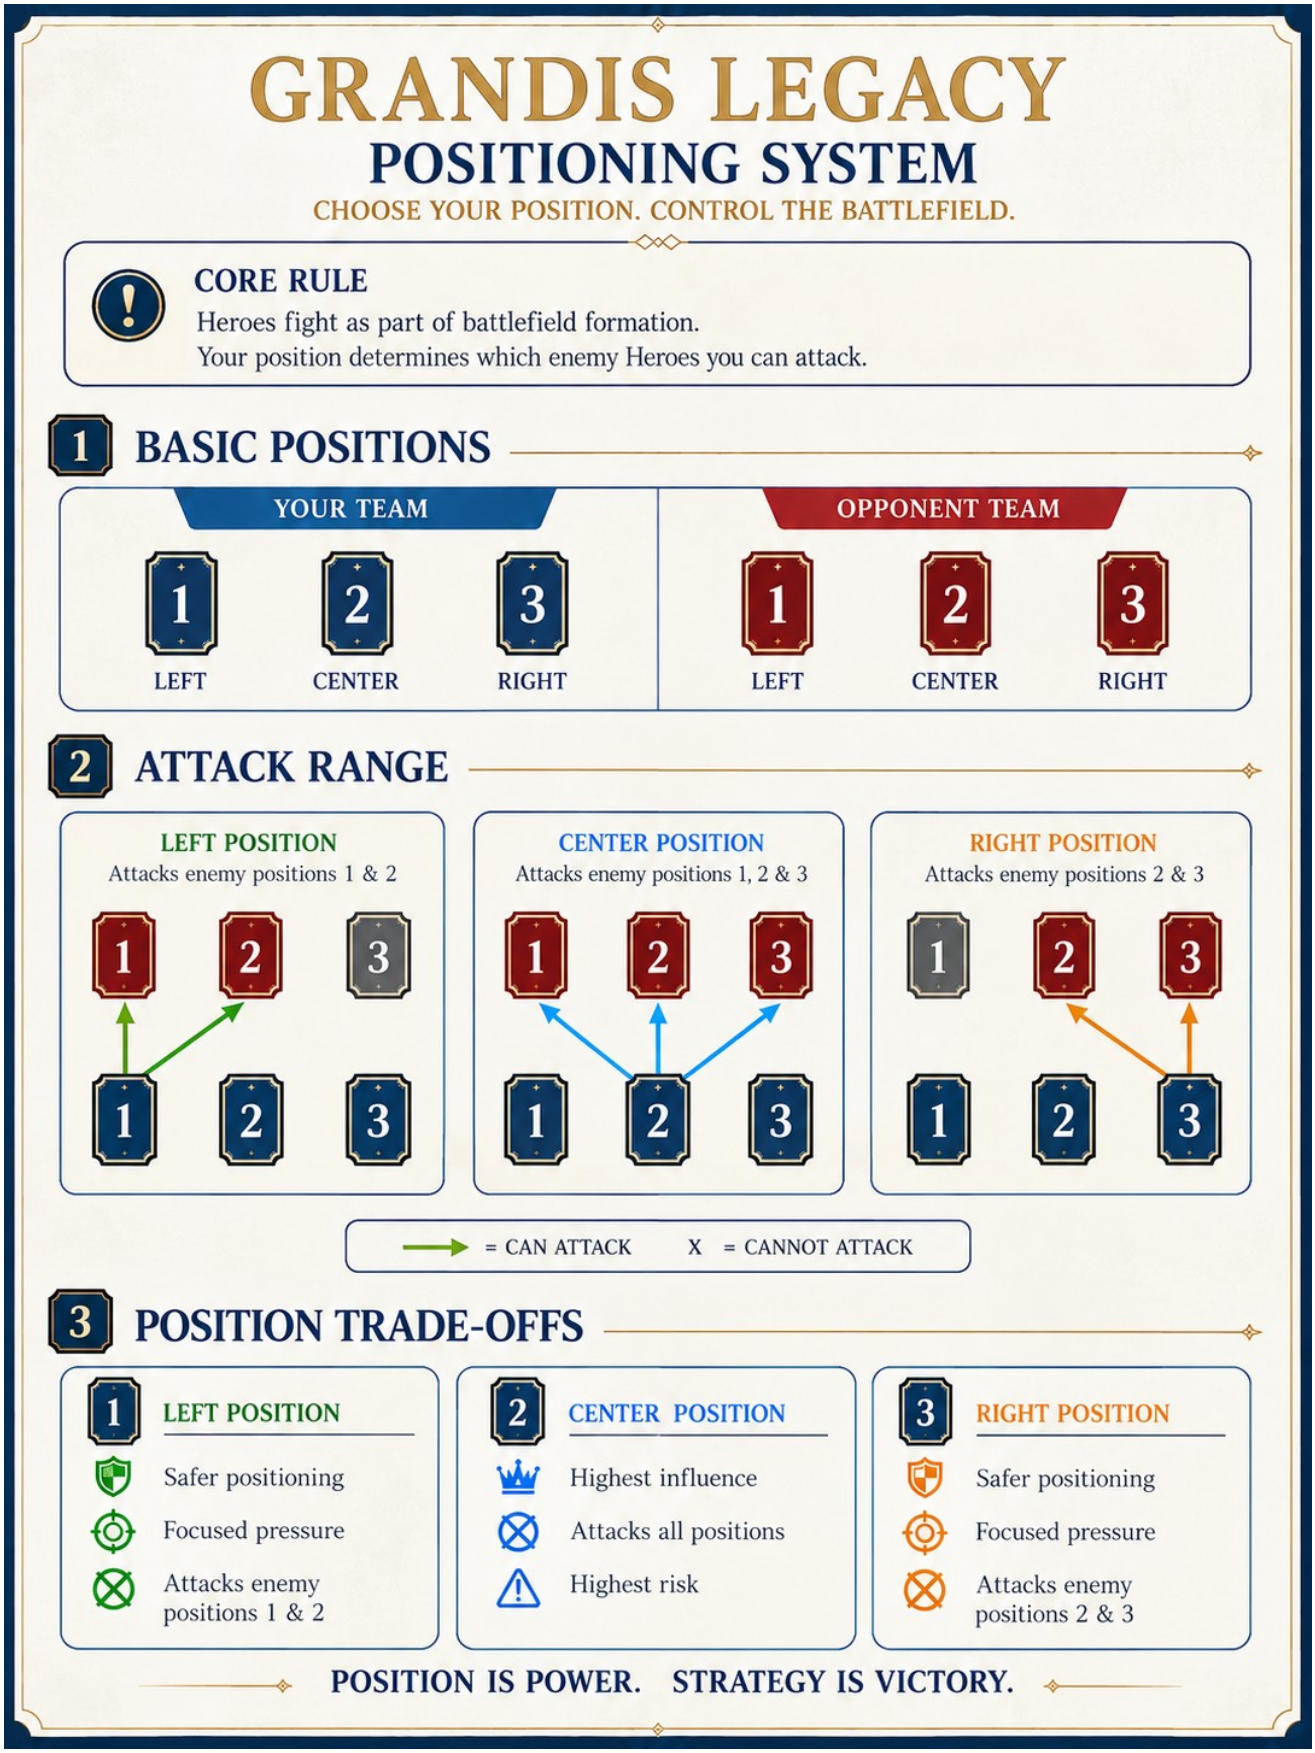

Attack Effect Timing

Effects that do not depend on an Attack hitting or dealing damage resolve before its damage, unless the card states otherwise. Status inflicted by an Attack is applied after that Attack's damage, unless the card states otherwise.

Attack Hits and Damage

An Attack hits unless it is successfully Dodged or Negated, even if its damage is reduced to 0. An Attack deals damage only if it reduces the target's HP.

7. Positioning System

This diagram shows the normal Left / Center / Right attack coverage. Keywords can modify this coverage.

8. Response, Reaction, Attachment, and Casting

Response

Action played > Choose legal Response > Pay costs > Opponent may respond > Last card resolves first > Original action continues

Response is normally available only during the Battle Phase. Cards with REACTION may respond outside this phase when their stated trigger occurs. A player may use a legal Defense or REACTION card, responding separately for each Hero affected by Area or multi-target effects. Resolve the Attack and Responses together before deciding Defeat and the match result.

Defense and Reaction

Term	Rule
Defense	Used during Response. Unless the card states otherwise, a Defense Skill is used for the active Hero being attacked. That Hero must meet the Skill's requirements. Defense does not Exhaust that Hero.
REACTION	A non-Defense card with REACTION can be used as a Response when its stated trigger occurs, even outside the Battle Phase. It does not Exhaust a Hero. Normal card requirements still apply.

Response Effects

Term	Rule
Redirect	Changes the target of an Attack or effect according to the card text.
Negate	Stops a card or effect from resolving according to the card text. Ultimate Cards cannot be Negated unless a card explicitly allows it.
Repeated Attacks	Each Attack in a repeated sequence may be Negated with a separate legal Response. Negating one Attack does not cancel the others.

Paid Costs and Negate

After Mana and other required costs are paid, any required Exhaust also applies. If the card is later Negated, those costs and Exhaust are not refunded.

Attachment

- Each Hero has 2 Attachment Slots.
- A card becomes an Attachment while its effect remains active.
- An immediate effect uses no Attachment Slot; a lasting INVINCIBLE effect does.
- A required slot must be available before the card is played.
- Attachments follow the Hero when Heroes swap positions.
- When an effect ends, is used up, or the Hero is defeated, the Attachment goes to Discard.

Casting

Casting locks a target position, not a Hero. Choose an opposing position when Casting is played; when released, it affects the Hero currently occupying that position.

- If the locked position contains a Legacy when Casting is released, the Casting ends without hitting a Hero or dealing damage.

- Casting uses an Attachment Slot and makes the Casting Hero Exhausted.
- If the Casting Hero changes position or is affected by Stun before release, the Casting is canceled.
- Sleep does not cancel an existing Casting. While the Casting Hero is asleep, its Casting Time does not increase and the Casting cannot be released.
- Timed Casting starts at 0. Casting Time increases by 1 during its owner's End Phase. Release the Attack during the Battle Phase when the required Casting Time is reached, unless the card states otherwise.
- Some Casting Cards do not use Casting Time. They become ready according to their card text, then follow the normal Casting release rules.
- After Casting resolves, the Casting Hero remains Exhausted until the next Draw Phase.

9. Tribute and Rank Up

Tribute

Tribute converts 1 Skill Card from Hand into EXP for a chosen active Hero.

Tribute Rule	Explanation
Timing	Reform Phase.
Limit	Maximum 1 normal Tribute each Reform Phase.
Printed Mana Cost	Not paid.
EXP Value	Normal Skill = 100 EXP. Ultimate = 200 EXP.
Ultimate Requirement	The Ultimate may only be Tributed to its specific living Hero owner, and you must spend 1 matching Color Mana Shard from the Mana Pool.

Ultimate Tribute: both parts of the Ultimate Requirement must be satisfied at the same time. Printed Mana Cost is still ignored.

Rank Up

When a Hero's total EXP reaches the requirement for the next Rank, replace that Hero Card with the corresponding Rank card.

EXP	New Rank	Rank Up Bonus
300	Rank II	Return 2 Skill Cards used as EXP to your Hand. Mana Regen +1.
700	Rank III	Return 3 Skill Cards used as EXP to your Hand. Mana Regen +1.

When Ranking Up: replace the Hero with the next Rank card. Return Skill Cards used as EXP that can be returned to your Hand according to the Rank Up Bonus. Move the rest to Discard. The Hero keeps its existing damage. Status, Attachment, Casting, and Exhaust remain with the Hero. Mana Pool does not increase immediately.

10. Legacy Cards, Defeat, and Revive

What is a Legacy?

When a Hero is Defeated, place a Legacy Card on top of that Hero Card. Choose any available Legacy Card with the same Base Class (Rank I Class); it need not be from the defeated Hero's original package.

A Legacy is a defeated Hero. It has no HP, Rank, EXP, Status, Exhaust, or Attachment Slots.

Legacy Timing: Legacy Abilities may be used only during Deploy or Reform. Each Legacy may use its Ability once per turn and does not become Exhausted.

Using a Legacy Ability

Choose Legacy > **Pay the required matching Skill Card from Hand** > **Choose card/target if required** > **Resolve the Ability**

When a Hero is Defeated

When a Hero is Defeated

- Attachments go to Discard.
- Status is cleared.
- All EXP Cards beneath the Hero go to Discard.
- Pending Casting is canceled and its Casting Card goes to Discard.
- The Hero keeps the Rank it had reached; inherent EXP remains: Rank I 0 / Rank II 300 / Rank III 700.
- If all 3 Heroes are defeated, that player loses, unless both players lose their last active Hero in the same Attack/Defense exchange (draw).

Revive

- Return the Legacy Card to the Legacy Deck.
- The Hero regains HP as stated on the Revive Card.
- EXP, Status, and Exhaust follow the Revive Card.

11. Keywords

Keywords describe a card's special rules or effects. Card text specifies the amount, target, duration, or condition.

MELEE

This Attack can only target an opposing active Hero in the directly opposite position.

RANGE

This Attack can target Heroes outside its normal Area of Attack. Attacking outside that area counts as a Range Attack.

PIERCING

This Attack cannot be Blocked.

SURE HIT

This Attack cannot be Dodged.

BLOCK

Reduces incoming Attack damage as stated on the card.

DODGE

The Hero avoids the Attack.

BUFF

Using this Skill or Event does not change the Hero's Ready or Exhausted state.

CONDITION

The card can only be used when the condition stated on the card is met.

REACTION

May be used as a Response outside the Battle Phase when its stated trigger occurs.

HEAL

Restores HP as stated on the card.

REVIVE

Return the Legacy Card to the Legacy Deck. The Hero regains HP as stated on the Revive Card.

INVINCIBLE

The Hero cannot take damage from an opponent or receive new Status from an opponent. Existing Status remains active.

ALL OPPONENTS

Affects all opposing active Heroes, ignoring normal Area of Attack.

REFLECT

When this Hero is hit by an Attack, deal damage to the attacker as stated on the card.

MANA BURN

Remove as many Mana Shards as possible from your opponent's Mana Pool, up to the number stated on the card.

MANA STEAL

Remove as many Mana Shards as possible from your opponent's Mana Pool, up to the number stated on the card. Then take as many Mana Shards as possible from your Mana Deck into your Mana Pool, up to the number removed.

Buff Item is a Card Subtype. BUFF is a Keyword. They are separate rules terms.

SUPPORT REFERENCE

12. Status and Healing

Status follows its Hero when Heroes swap positions and does not use Attachment Slots. Legacy cannot receive Status.

Status	Effect
Bleed	This Hero cannot receive Healing. Bleed does not deal damage.
Burn	Whenever a played Card or activated Ability deals damage to this Hero, increase that damage by 10.
Freeze	This Hero cannot DODGE or swap positions.
Poison	This Hero takes 10 damage during its owner's End Phase.
Sleep	This Hero cannot use Skill or Event Cards, except Skills with DODGE. It wakes up when hit by another Attack.
Stun	This Hero cannot use Skill or Event Cards, activate Racial Traits, BLOCK, DODGE, or swap positions. It cannot initiate other active effects.

Status Duration: duration decreases by 1 during that Hero owner's End Phase and ends at 0. Poison deals damage before its duration decreases.

Status Stacking: Reapplying a Status adds its new duration to the remaining duration, up to 6 counters per Status per Hero. Stacking increases duration, not effect strength.

Invincible and Existing Status

Invincible does not remove, pause, or cleanse an existing Status. Existing Status remains active and its duration continues normally.

If an existing Poison came from an opponent, its Poison damage is prevented while Invincible is active. If Poison remains after Invincible ends, its damage applies normally on the next applicable End Phase.

Healing

- Healing cannot exceed Max HP.
- Single-target Healing requires a damaged Hero without Bleed.
- For multi-target Healing, full-HP Heroes, defeated Heroes, and Heroes with Bleed are skipped.
- Apply Healing Done and Healing Received modifiers when applicable.

13. Quick Reference

Topic	Short Rule
Win	Defeat all 3 opposing Heroes; simultaneous last-Hero defeat in one Attack/Defense exchange is a draw.
Deck-out	Lose only when the mandatory Draw cannot be performed because the Main Deck is empty.
Turn	Draw > Deploy > Battle > Reform > End.
Main Deck	Exactly 50 cards: Skill, Item, Event.
Copy Limits	Normal: maximum 3 copies; Special Event: maximum 1 copy each; Ultimate: maximum 1 copy.
Area of Attack	Left: Left/Center; Center: all; Right: Center/Right.
MELEE / RANGE	MELEE: opposite only. RANGE: reach outside AoA; attacks outside AoA count as Range Attacks.
Manual Reposition	Maximum 1 per active turn during Deploy/Reform; Swaps from card effects do not count.
1v1 Auto Center	Both Heroes stay in Center during 1v1 until a Hero is revived; Freeze and Stun do not prevent this.
Mana Deck	Exactly 12; any Color Mana allowed; maximum 1 of each color; rest Regular Mana Shards.
Opening	Opening Hand 5; 3 starting Mana Shards; Mana Regen starts at 1.
Mana	Regular Mana Shard = 1 Mana; matching Color Mana Shard = 2 Mana; otherwise 1 Mana.
Mana Regen	Each Rank Up gives +1, maximum 6.
Tribute	Normal Skill = 100 EXP. Ultimate = 200 EXP; requires Hero owner + matching Color Mana Shard.
Rank Up	Return eligible Skill Cards used as EXP according to the Rank Up Bonus; discard the rest; Mana Regen +1.
Defense	Used during Response by default.
REACTION	REACTION can be used outside Battle Phase when its stated trigger occurs.
Event	A normal Event requires a legal Hero and Exhausts that Hero after paying Mana and mandatory costs.
Item	Does not Exhaust a Hero by default.
Attachment	2 slots per Hero.
Legacy	On defeat choose an available Legacy with matching Base Class; Legacy Ability may be used only during Deploy/Reform.
Racial Token	Maximum 2; use at most 1 during the active turn.
Status Stacking	All Statuses stack, up to 6 counters per Status per Hero.

Three Main Flows

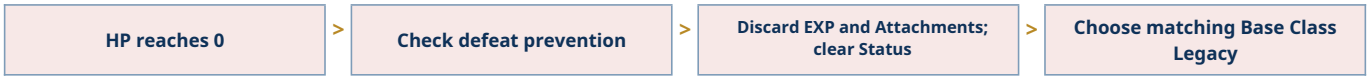

ATTACK

RANK UP

DEFEAT

Hand and Search

- Hand is private.
- After searching or viewing the Main Deck, shuffle unless a card states otherwise.
- **A Draw effect takes as many cards as are available, including 0, without causing an immediate loss.**
- When cards return to the Main Deck, shuffle unless their placement is specified or the card states otherwise.

END OF PLAYER RULEBOOK
